# 1. General Information

## 1.1 Application overview

The application, Multiple Sclerosis Doctor, is designed for neurologists specialized in Multiple Sclerosis disease to remotely monitor their patients' health state through an intuitive and efficient interface. Patients record their ECG (Electrocardiogram) and EMG (Electromyogram) signals and report their symptoms directly to their assigned doctor.

This system ensures that neurologists have access to accurate, real-time data, enabling them to track patient progression and make timely medical decisions. By maintaining consistent records of physiological data and symptoms, neurologists can provide more personalized care and respond effectively to any changes in the patient's condition.

## 2. Application features

### 2.1 Server Connection

#### 2.2.1 IP Address

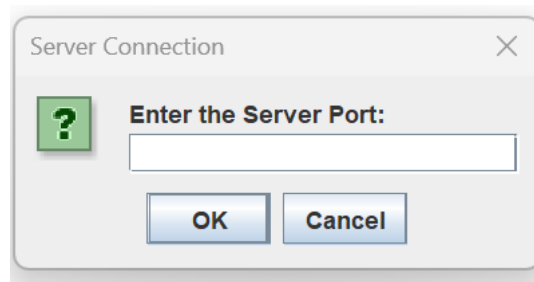

The initial IP address configured is "localhost"

Figure 1. Server connection (IP Address)

#### 2.2.2 Server Port

The initial port for doctors' access is "9001"

A dialog box titled "Server Connection" with a close button (X) in the top right corner. On the left, there is a green square icon containing a white question mark. To the right of the icon, the text "Enter the Server Port:" is displayed above a white text input field. Below the input field are two buttons: "OK" and "Cancel".

Figure 2. Server connection (Port)

## 2.3 Home Screen

Upon launching the application for the doctor, the home screen provides two primary options: Sign Up and Log In.

Click on the "Sign Up" button if you do not have an account and want to create one.

Click on the "Log In" button if you already have an account and want to log in.

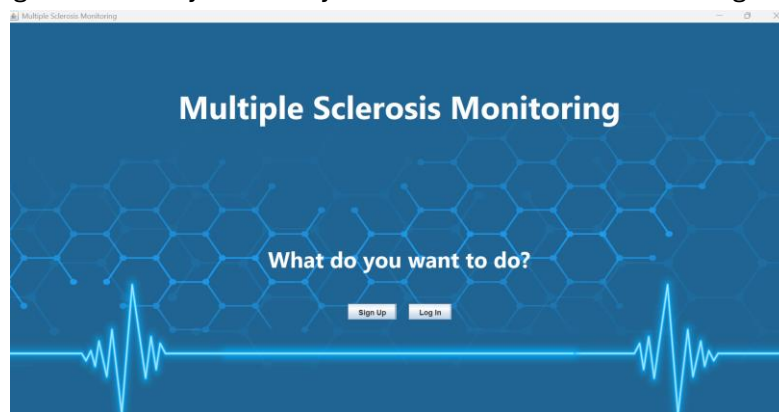

Figure 3. Home Screen

### 2.3.1 Sign up

In order to sign up and create an account in the app, the user must fill out the form displayed in the screen with accurate information ( full name, surname, username, and password). All fields must be filled out as the pattern is expected, otherwise an alert will pop up on the screen. To see how that data should be entered, the cursor must be placed on top of the white boxes.

A sign up form with a blue background and a hexagonal pattern. It contains four input fields with placeholder text:
 

- Name:** A white text input field.
- Surname:** A white text input field with the placeholder "Enter your full first name. Example: John".
- Username:** A white text input field with the placeholder "Enter a unique username. Example: johndoe@gmail.com".
- Password:** A white text input field with the placeholder "Enter a strong password with at least 8 characters, including uppercase, lowercase, and a number." Below this field are "Cancel" and "OK" buttons.

Once the details are completed, click OK to finalize the registration.

A 'Sign Up' form with a blue background featuring a hexagonal pattern. The form contains four input fields: 'Name' with 'DR.Marcos', 'Surname' with 'Perales', 'Username' with 'doctor.perales@multipleSclerosis.com', and 'Password' with masked characters '.....'. The title 'Sign Up' is at the top right.

## 2.4 Doctor dashboard

Once logged in, the system provides several features, including viewing my personal details, view assigned patients and reports, modifying settings, or logging out.

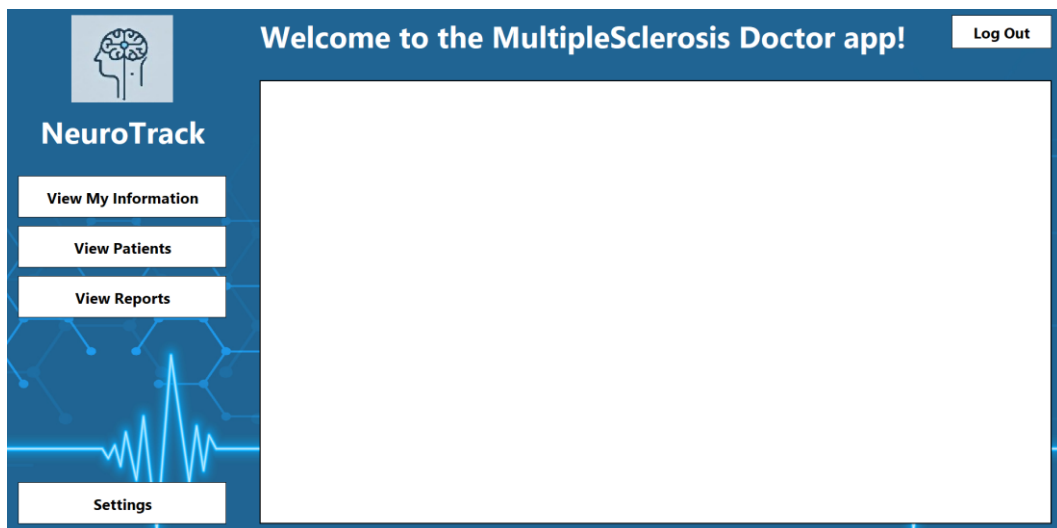

Figure 8. Doctor dashboard

### 2.4.1 View My Information

To view the doctor's professional information, the doctor can click on the "View My Information". This action will display the doctor's name and specialty, providing you with quick access to verify your professional information.

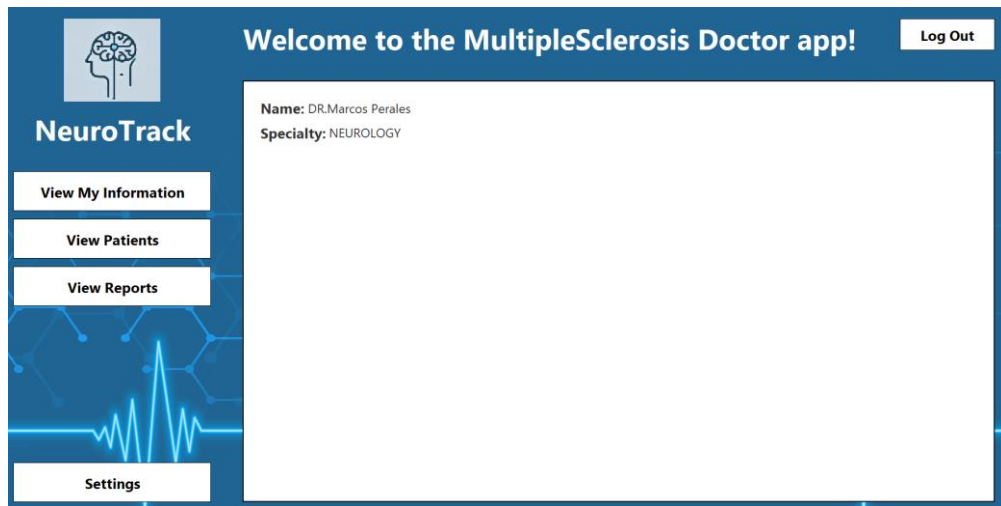

Figure 9. View personal information

## 2.4.2 View Patients

To manage patients assigned to each doctor, we can control it with the "View Patients" button. A searchable list of your patients will appear, displaying their name and surname. The doctor can also use the search bar to locate a specific patient quickly. Once the doctor find the desired patient, the doctor can manage individually to.

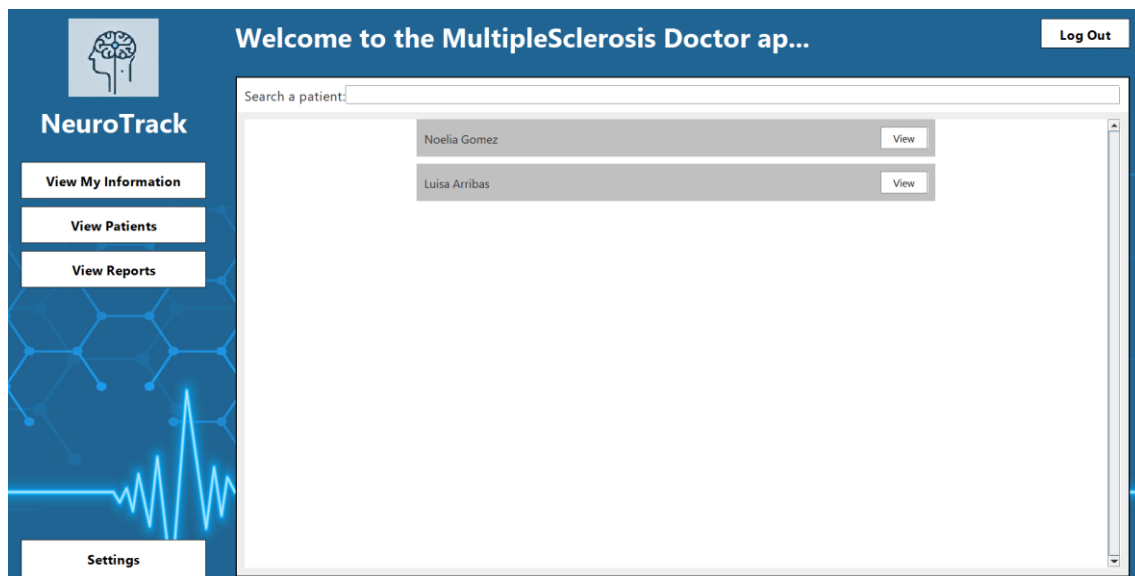

Figure 10. View patients assigned to the doctor

### 2.4.2.1 View

Clicking the View of a specific patient, the doctor can see its content in detail. Including name, surname, date of birth, gender, phone number and reports associated to that patient.

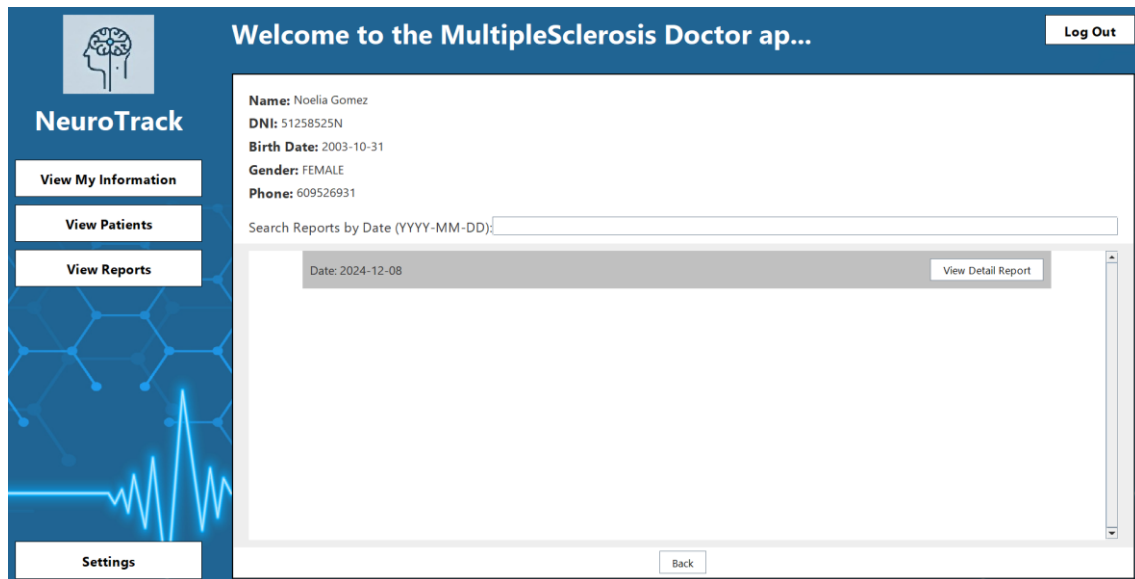

Figure 11. View detailed information about a patient

### 2.4.3 View Reports

To review all the reports, there is a "View Reports" button. You can use the search bar to filter reports by date in the format indicated YYYY-MM-DD. The system will display a list of available reports, including the report date and the corresponding patient name.

### 2.4.3.1 View Details

Clicking this section, the doctor has access to specific report information and reviews its content in detail, to make appropriate feedback.

### 2.4.4 Settings

This bottom enables the doctor to update information to the system. This feature allows for customization of the application, ensuring it suits the doctor’s actual information needs and preferences on its password.

### 2.4.5 Log Out

Finally, when a doctor decides to log out of the application, a confirmation dialog appears, this ensures that the decision to log out is intentional, preventing accidental disconnection. Once the action is confirmed, the application securely ends the user's session, protecting the patient's account and ensuring the confidentiality of their data.
